

Everything below is what NestBook provides, for you to win more direct bookings and keep them coming through the quiet months. Tick off what you already have — whatever's left unchecked, NestBook covers it from day one.

Your Branded Booking Webpage

- ☐ **Image-rich hero** (A striking header photo of your property, designed to capture attention the moment visitors land on your page.)
- ☐ **Room photos** (Real photos of each individual room — no guessing for your guests.)
- ☐ **Room descriptions & amenities** (Full information for every room, so guests know exactly what they're booking.)
- ☐ **Check-in / check-out times, up front** (Displayed clearly on first view, so visitors know exactly what to expect.)
- ☐ **About us** (Tell visitors who you are and what makes your property special.)
- ☐ **At a Glance** (Key facts — pets, parking, capacity and more — shown instantly, no digging required.)
- ☐ **Individual room calendars** (Real-time availability per room, so a returning guest can check their favourite room is free.)
- ☐ **Individually bookable rooms** (Guests book a specific room, not just a property — ideal for returning guests with a favourite.)
- ☐ **Partnership links** (Boost low-season bookings by cross-promoting local businesses on your own page.)
- ☐ **Location map** (Visitors never need to leave your page to find you.)

Direct Bookings, Taken efficiently

- ☐ **Booking widget on your page** (Guests book without ever leaving your booking webpage — no wasted time, no lost visitors.)
- ☐ **Card payments, built in** (Take secure payments inside the widget itself — no clunky redirects to lose a booking along the way.)
- ☐ **Specials banner** (Highlight current offers to entice visitors to book, right on your page.)
- ☐ **Social media booking button** (Put a Book Now button directly on your Facebook or Instagram page.)
- ☐ **The same widget, on your own website** (Embedded directly on your own website — more visibility, better search results, more bookings.)

Marketing, On Autopilot

- ☐ **Social Media Kit** (Auto-generated captions and images from your own property photos — just copy and post.)
- ☐ **Guest mailer** (A property-branded email tool to reach your own guest list, under your own name.)
- ☐ **Property info sheet creator** (Create A printable, branded welcome document — house rules, Wifi, and local recommendations.)
- ☐ **QR Code generator** (Branded, downloadable codes for Wifi, your booking page, and more.)
- ☐ **Review requests** (Automated post-stay emails asking guests for a Google or TripAdvisor review, or a note for your own page.)

Smarter Pricing, All Year Round

- ☐ **Seasonal pricing** (Set your high- and low-season rates once and let it run itself.)

Every feature on this checklist is included with a NestBook **Pro** or **Multi** plan — see it running on a real property at nestbook.io
